PREFACE

It is with great pride and pleasure that I present, on behalf of the Sarita Kenedy East Law Library, this first edition of the Rare Book and Special Collections Bibliography. This publication was authored by Beatrice Citron, Rare Book Librarian, and contains a detailed listing and description of the Library's rare books.

This Bibliography represents a milestone in the development of the Library's rare and special collections since it provides an extraordinarily useful access tool for those collections. It also coincides with the renovation of the Library's Rare Book Room which was not completed at the time the Sarita Kenedy East Law Library was constructed in 1984 with funds donated by the John G. and Marie Stella Kenedy Memorial Foundation. This room will provide the optimal environment for the scholarly research of the Library's rare legal materials. Special thanks are owed to Dean James N. Castleberry, Jr. who obtained the additional funding for the renovation.

A handwritten signature in black ink, appearing to read "R. Summers, Jr.", with a stylized flourish extending to the right.

## INTRODUCTION

This Bibliography lists the rare books of the Sarita Kenedy East Law Library alphabetically by author, with information concerning the title, date, place of publication, and Library of Congress classification number. This is often followed by brief notes of interest including references to the sources of information. We have noted donors whenever we are aware of their names, but regrettably early records of past donations are not complete. This bibliography will be supplemented as needed. The illustrations are taken from our collection of rare books.

Due to generous gifts, this somewhat eclectic collection includes a volume of the Pandecta printed in Venice in 1591, a first edition of Blackstone's Commentaries, Coke's Reports, Spanish law such as Las Siete Partidas and Spanish Colonial Law, early Texas law and an anti-trust law book written and signed by President William Howard Taft.

Criteria for designating an item as "rare" are broad, numerous and subjective. Among those used as general guidelines are date of publication or age, the prominence of the author, market value or cost, content, association value, scarcity or uniqueness, physical condition and quality.

A rare book collection is essential to a good research library. Three propositions must be understood: (1) rare books must be handled differently from ordinary books; (2) a collection of great rare books will only maintain value if it receives sustained attention; and (3) the people responsible for a rare book collection must be imbued with the concept of rare books as treasurable objects. In order to protect and preserve the rare books it is necessary that their use be restricted and subject to rules of use. Please see the Law Library's Rare Book Handbook for complete information on such rules.
